Watch Reserve Session History

Append-only session document · initialized 22 September 2026

Session — 22 September 2026

Added project guidance in `AGENTS.md` for the shared form success treatment and for future commit/session-log behaviour.

Created `FormSuccess.svelte` as the reusable success-state component, then migrated the homepage valuation popup and the /sell Ask Me Later rebound form to use it.

Updated customer confirmation emails in `customerConfirmation.js`: the immediate free-valuation email now uses the dynamic month, confirms a secure upload link, and includes a 20-minute fallback contact instruction; the five-minute Valuation Link email uses the dynamic month offer title and separates the next-step copy.

Changed files

File	Change
AGENTS.md	Project and commit/session-history guidance
src/lib/components/FormSuccess.svelte	Reusable styled success message
src/lib/components/FreeValuationModal.svelte	Uses shared success component
src/lib/components/AskMeLaterReminder.svelte	Uses shared success component
src/lib/customerConfirmation.js	Updated immediate and scheduled email copy

Verification

• Targeted ESLint passed for the changed JavaScript and Svelte files.

• Prettier checks and git diff checks passed.

• Production build passed; existing unrelated Svelte warnings remain.

This document is append-only. Future sessions must add entries to this PDF rather than creating a separate session document.
